Surface Quality (Tested to ISO 4586-2)

ATTRIBUTE	MEASUREMENT	
Inspection Guidelines	Viewing distance 0.75 to 1.5m from laminate surface Light intensity approximately 800 to 1000 lx at the laminate surface Using normal vision, corrected if necessary. No magnification devices	
Dirt, Spots & Similar Surface Defects	The admissible size of defects is based on a maximum contamination area equivalent to 1.0mm²/m² and is proportional to the sheet size under inspection	
	The total admissible area of contamination may be concentrated in one spot or dispersed over an unlimited amount of smaller defects	
Fibres, Hairs & Scratches	The admissible size of defects is based on a maximum contamination length equivalent to 10mm/m² and is proportional to the sheet size under inspection	
	The total admissible length of contamination may be concentrated in one defect or dispersed over an unlimited amount of smaller defects
